The Food & Fertilizer Technology Center (FFTC) as a regional information center in the Asian and Pacific (ASPAC) region has played an important role in collecting, exchanging, and disseminating information on all range of modern and practical technologies, covering the full spectrum of agricultural activities relevant to the region.

Through its various activities like seminars and workshops, training courses, and regional surveys, we have accumulated a huge body of knowledge and information made possible through the works of hundreds of people from member countries and partner institutions.

Disseminated through publications, training courses and demonstration projects, these knowledge and information are delivered to countless extension workers, researchers and scientists in the region. FFTC also has an agricultural policy platform for sharing agricultural policy information.

The FFTC Agricultural Policy Platform Project (FFTC-AP)

The agricultural policy platform project started in 2013 and is now in its 7th year. The goal of this project is to promote communication between countries in the Asia-Pacific region regarding their respective national agricultural policies. The specific objective of FFTC-AP project is to establish a database of national agricultural policies for sharing and exchanging agricultural policy information across different countries.

We covered the agricultural policies of Asian Pacific countries and have contracted partners who contribute papers from Indonesia, Japan, Korea, Malaysia, Myanmar, Philippines, Taiwan, Thailand, and Vietnam etc.

The FFTC-AP website offers a platform for those who are interested in the development of agriculture and agricultural policies in the Asian and Pacific region, such as students, professors, researchers, government officials, extension workers and farmers, to retrieve needed information.

Call for papers
2019 Agricultural Policy Platform Project (FFTC-AP)

You are invited to contribute agricultural policy related papers in English to Agricultural Policy Platform (FFTC-AP) for publishing on the FFTC-AP website. We can also consider your papers for submission to our e-journal publications. FFTC-AP is an information sharing website, and we welcome agricultural policy related papers or translated papers of other languages (in this case, the links or the sources of the papers/ websites should be provided) from researchers, academicians, professional and practitioners from all over the world. Join us and be part of our team!
